

Our neighborhood was awarded the ABQ NeighborWoods Grant - 200 Free Trees!

We want to create an impact with clusters of Street Trees!

- Street trees can be planted anywhere within 20ft of the street.
- Our excavator will ensure all utility lines get spotted, they will facilitate digging the holes, and they will provide the mulch for all the street trees.
- Homeowners are responsible for marking their own private watering or sprinkling systems. The Excavator and TNM are not responsible for damage to these.
- All street trees will be planted in one day by volunteers, many of which should come from the neighborhood. This is a great way to build the community!
- Homeowners who want to receive a street tree will be required to sign a City agreement promising that they will water and care for their trees.
- Professional landscape architects will do the final tree species population. They will ensure that right tree goes into the right space! Your preference is considered, but our landscape architects always have the final say.
- Tree varieties and sizes will vary due to grower availability. Also, Tree New Mexico follows the City and Water Authority guidelines regarding tree species recommended for our area. Non-invasive roots, flowering (for bees), fall color, shade, water wise, etc
- As part of the ABQ NeighborWoods program, for the following three years, an arborist will come out to assess the health of the new trees. Homeowners will be provided with training information as needed and will be notified of any issues and remedies as well.
- Free pruning classes will be provided as part of the program.
- Although Tree New Mexico does not remove trees, there are several tree removal companies in Albuquerque to choose from. If a homeowner has a tree that needs to be removed, this must be done by the homeowner prior to planting any new one.

Neighbors, please contact Tree New Mexico at NPnewtrees@gmail.com as soon as possible with your interest about adopting a tree or to volunteer to help canvass or plant!
